

## *With Oceanco is Simply Custom*

“Simply Custom” is a fascinating and bold design conceived by the Dutch shipyard Oceanco renowned for its nature to build superyachts beyond expectations. Its conception is designed to offer deep enthusiasm and significant inspiration, solid creative proposals for a wide range of tastes and lifestyles for today’s owners who wish to spend their time on board. Oceanco’s introduction of Simply Custom thinking marks a true creative revolution and strategic evolution in the design and construction of advanced superyachts. Aiming to cater to experienced owners who seek a balance between customization, efficiency and sustainability, one can interpret their changing priorities due to their fast-paced lives as they aspire to build their own new superyacht. And it finds its ideal status in the range between 80m (276ft) and 90m (295ft) and volumes between 2500 and 2700 Gross tonnage, where design and technical excellence are essential, as is the time to realize. To implement such a far-reaching

plan, Oceanco engaged 15 top international design studios, bringing them together in a community called the Collection, who individually designed a wide range of unique exterior designs that could be realized on a shared platform and technical basis. This collaboration with renowned and emerging designers ensures a variety of styles that meet the different preferences of owners, making each yacht unique and truly original. And the collaboration continues with five industry-leading interior design studios increasing the value with various themes that can be adapted or fully customized to meet specific lifestyle needs. The Simply Custom layout thus has incredible strength in flexibility. From the owner’s suite to the six VIP guest rooms and from multifunctional lounges to wellness areas, the interiors emphasize a unique character combined with the complex features and technologies on board but ready for any extreme customization of spaces.
