**BILGIN YACHTS**  
**KASIF**  
**BUILDER'S STATEMENT**

At Bilgin Yachts, we take immense pride in crafting luxury vessels that embody the epitome of maritime excellence, and it is with great excitement that we announce the launch of our latest masterpiece, the extraordinary explorer yacht, "Kasif."

The yacht marks a significant milestone in our shipyard's storied history, as it proudly emerges as the maiden creation from our new Antalya facility. This achievement not only underscores our commitment to innovation but also sets the stage for upcoming endeavors, with ambitious plans underway for the construction of 52 and 60-meter yachts at the same facility. Breaking new grounds in both design and performance, Kasif is a testament to our dedication to pushing boundaries in the world of yacht craftsmanship.

This visionary vessel presents an exceptional blend of comfort, quality, and modernity, reminiscent of the renowned 50-meter series that Bilgin is acclaimed for. Built at our state-of-the-art south facility in the prestigious Antalya Zone, the yacht embodies the sporty and dynamic appearance that we cherish, elegantly translating it to this yacht while maintaining its modern lines. With a length of 41.90 meters, this vessel encapsulates the essence of exploration, echoing the spirit of its name, "Kasif," which translates to "explorer" in Turkish.

Kasif's unveiling goes beyond being just another yacht launch; it symbolizes Bilgin Yachts' unwavering spirit of innovation and its eagerness to explore uncharted waters. Just as this remarkable explorer yacht embarks on a journey of discovery, we continue our pursuit of excellence by venturing into fresh territories of design and craftsmanship. From a technical standpoint, the yacht boasts impressive specifications. Its hull configuration is displacement, constructed from steel with a superstructure made of aluminum.

With a gross tonnage of 386GT and a full-load displacement of 360 tons, Kasif offers exceptional stability and performance. Equipped with CAT C18 main engines generating 25500 kW, it achieves a cruising speed of 10 knots with a remarkable range of over 7,000 miles at economical speed at half load. The exterior design and the naval architecture of Kasif is a product of the renowned Unique Yacht Design. The interior, a seamless blend of elegance and functionality, is crafted by Hot Lab, ensuring that every detail of Kasif's interior spaces reflects the same commitment to excellence that defines Bilgin Yachts. As we celebrate the launch of this remarkable vessel, we look forward to seeing Kasif embark on its own explorations and adventures on the open sea, just as we at Bilgin Yachts continue to explore new horizons in the world of luxury yacht construction.
